

Needless Damage to Private Property

October 2016

With the hard work of Manor volunteers, a rolling dip was created near the top of Uphill Road to manage storm water runoff. The rolling dip will prevent sand from building up at the bottom of Uphill, keeping the road open for all neighbors in the Manor.

Unfortunately, someone decided to drive around the dip causing needless damage to private property, destroying desert plants and the integrity of the road bank. Since owners/residents of the Monument Manor Neighborhood Association (MMNA) paid for the fill dirt and equipment grading to create the dip, this mean-spirited action also hits your pocket book.

Such destructive behavior is not neighborly and is not necessary. Any of the officers of the MMNA are available and happy to talk to any resident who has questions, concerns, or criticisms of the projects the MMNA undertakes. The opinions of those in the Manor are important to us.

On a positive note, if you see ways to improve our roads or have questions, we encourage you to contact us so that we can work with you to address them. For more information, contact Geary Hund, chair of the roads committee at gwhund@gmail.com.
